

The Third Grade Howls

Mrs. Smith

October 15, 2009

+Greetings from the Den

Invention Convention

The students in 3rd through 7th grades are busy "creating" new things for us. We should see many unique items at the Invention Convention. Remember, the project is due at school November 3. All "intent to invent" forms should have been turned in by now. They were due Oct. 7. The first Progress Check for 4th grade has been sent home. There will be two more. Keep thinking!

Third Grade Science

Third grade is studying the five main ecosystems of Georgia. The class is learning about the different plants and animals that live in the different areas. They are also learning how the plants and animals have adapted to survive in some of the harsher environments. Ask them which ones we have studied.

Fourth Grade Science

Fourth graders have been working hard researching ecosystems to show the flow of energy through them. They will be making dioramas to demonstrate the food webs.

DATES TO REMEMBER

REPORT CARD CONFERENCES
10/15 AND 10/16

FIELD TRIP TO BALLET 10/27

HALLOWEEN PARTY 10/30
